Input: task, trajectory, score
Planning
wrong answer with no tool failure, and tools needed but unused, or no plan, or no tools at all
Tool misuse
forbidden tool, or a failed call not followed by an environment error
Context
the same call, with the same arguments, right after its observation
Recovery
an error with no later working call of that tool and no correct answer
Horizon
no final answer, or more steps than max_steps
Collect matched modes, each with the index of its first evidence and a plain-language reason
any mode matched?
yes
no
root cause = mode with the earliest first evidence
FailureReport: modes, root cause, evidence, recovery effectiveness
run succeeded?
no
yes
unclassified (never forced into a mode)
clean run
